Although L's visit to Bombay was v. private, only a few being informed, Crowds came to see them during the last 2 days, and many this morning, esp. before 8 o'clock - No TALK was the first warning to all, yet it went on as usual. & B. has to either ask or reply to questions asked. In some, he advised himself for certain things -

To see B. work on a variety of things in rapid sequence one after the other, for hours is to see ^{of wisdom} Supremacy at work. Your business topics on business quicken into competence for which he generally came down to Bombay, he is diverted to a thousand & one questions of visitors with all kinds of tales of their Myers or Sufferings without end, to paraphrase, to almost each detail requires indeed definite patience & definite wisdom to tackle. Master alone could do that. One is sure eyes watching this, for hours: and there are many workers by his side, who take turns as & when possible - Yet he works alone all throughout. This is true Mastery, in Service!

Sea of Melera's - While on their way to Nasik, B. party halted near - have tea at Inchar in Sp. request a incidentally, see a pretty by crowd.
